PAYBACKER

UAT & UX Test Plan

paybacker.co.uk

Version 1.0 | April 2026

Prepared by: Paybacker QA Team

Total Test Cases: 94 | Critical: 24 | High: 47 | Medium: 22 | Low: 1

Table of Contents

Introduction

This document contains the complete User Acceptance Testing (UAT) and User Experience (UX) test plan for Paybacker (paybacker.co.uk), an AI-powered savings platform for UK consumers.

Paybacker helps users dispute unfair bills with AI-generated complaint letters citing UK consumer law, track subscriptions and recurring payments, scan bank accounts and email inboxes for hidden costs, and take control of their finances.

Purpose

This test plan is designed for external QA testers to systematically test every feature of the Paybacker platform. It covers functional testing (UAT), cross-browser/device testing, security testing, and subjective UX quality assessment.

How to Use This Document

Work through each section in order. For every test case: read the preconditions and steps carefully, execute the steps exactly as described, record your result (Pass/Fail) in the Pass/Fail column, and if a test fails, create a detailed bug report (see Bug Reporting section below).

Test Environment

URL: https://paybacker.co.uk

Test Account: Will be provided separately via Upwork message

Browsers Required: Chrome (latest), Firefox (latest), Safari (latest if available), Mobile Safari, Android Chrome

Devices: Desktop (1920x1080), Tablet (768px width), Mobile (375px width)

Bug Reporting Format

For each failed test, please create a bug report with the following information:

1. Test Case ID (e.g. LP-001)
2. Browser and device used
3. Steps to reproduce (exact steps you took)
4. Expected result vs actual result
5. Screenshot or screen recording
6. Severity: Critical / High / Medium / Low
7. Any console errors (open DevTools > Console tab)

Please submit all bug reports in a single document or spreadsheet at the end of testing, grouped by severity.

Priority Legend

Priority	Description
Critical	Must work. Blocking issue if broken. Core user flows that directly impact revenue or user acquisition.
High	Important feature. Should work correctly. Impacts user satisfaction significantly if broken.
Medium	Nice to have working. Minor impact on user experience. Can be fixed in a subsequent release.
Low	Minor cosmetic or edge case. Fix when convenient.

1. Landing Page & Navigation

Tests covering the public-facing landing page, navigation, responsiveness, and general UI/UX quality.

ID	Test Case	Priority	Pass/Fail
LP-001	**Landing page loads correctly** **Preconditions:** *None - fresh browser session* **Steps:** 1. Navigate to paybacker.co.uk 2. Wait for page to fully load 3. Check all sections render **Expected Result:** Page loads within 3 seconds. Hero section, features, pricing, CTA buttons all visible. No console errors.	**Critical**	Chrome: Pass Firefox: Fail Safari : Pass Mobile Safari: Pass Android Chrome: Pass
LP-002	**Navigation menu links work** **Preconditions:** *On landing page* **Steps:** 1. Click each navigation link in header2. Verify each section/page loads3. Test logo click returns to homepage **Expected Result:** All nav links navigate correctly. No broken links. Logo returns to homepage.	**High**	Chrome: Pass Firefox: Pass Safari : Pass Mobile Safari: Pass Android Chrome: Pass
LP-003	**Mobile responsiveness** **Preconditions:** *None* **Steps:** 1. Resize browser to 375px width (iPhone)2. Check layout at 768px (tablet)3. Check at 1024px (small laptop)4. Test hamburger menu on mobile **Expected Result:** Layout adapts cleanly at all breakpoints. No horizontal scroll. Text readable. Buttons tappable. Hamburger menu opens/closes correctly.	**Critical**	Pass
LP-004	**CTA buttons visible and working** **Preconditions:** *On landing page* **Steps:** 1. Locate 'Sign up free' / 'Get Started' buttons2. Click each CTA button3. Verify destination **Expected Result:** All CTA buttons are visible, styled correctly with gold accent, and navigate to signup/pricing page.	**Critical**	Chrome: Pass Firefox: Pass Safari : Pass Mobile Safari: Pass Android Chrome: Pass
LP-005	**Footer links and content** **Preconditions:** *On any page* **Steps:** 1. Scroll to footer2. Check company info, links, social media icons3. Click each footer link **Expected Result:** Footer displays correctly. All links work. Social icons link to correct profiles. Copyright shows current year.	**Medium**	Chrome: Pass Firefox: Pass Safari : Pass Mobile Safari: Pass Android Chrome: Pass
LP-006	**Page load performance** **Preconditions:** *Clear browser cache* **Steps:** 1. Open DevTools > Network tab2. Navigate to paybacker.co.uk3. Note total load time and largest contentful paint **Expected Result:** Page load < 3s on broadband. LCP < 2.5s. No render-blocking resources causing delay.	**High**	Chrome: Pass Firefox: Pass Safari : Pass
LP-007	**SEO meta tags present** **Preconditions:** *On landing page* **Steps:** 1. View page source2. Check for title, meta description, Open Graph tags3. Check JSON-LD schema markup	**Medium**	Chrome: Pass Firefox: Pass Safari : Pass

ID	Test Case	Priority	Pass/Fail
	Expected Result: Title tag present and descriptive. Meta description < 160 chars. OG tags for social sharing. JSON-LD schema markup present.		
LP-008	**Dark premium aesthetic consistency** **Preconditions:** *Browse multiple pages* **Steps:** 1. Navigate through all main pages2. Check colour scheme consistency3. Verify typography **Expected Result:** Deep navy background, gold accents, white text throughout. Clean sans-serif typography. Consistent design language.	**Medium**	Color Scheme : Pass Typography : Pass Design Language : Pass

2. Authentication (Sign Up / Login / Logout)

Tests covering user registration, login, logout, password reset, and session management.

ID	Test Case	Priority	Pass/Fail
AU-001	**Email/password signup** **Preconditions:** *Not logged in* **Steps:** 1. Click 'Sign Up' / 'Get Started Free'2. Enter valid email and password3. Submit form4. Check for confirmation email **Expected Result:** Account created successfully. User redirected to dashboard or email verification page. Confirmation email received.	**Critical**	Pass
AU-002	**Signup validation - invalid email** **Preconditions:** *On signup page* **Steps:** 1. Enter invalid email (no @, spaces, etc.)2. Enter valid password3. Submit form **Expected Result:** Form shows clear error message. Account is NOT created. Error message is specific (e.g. 'Please enter a valid email address').	**High**	Fail
AU-003	**Signup validation - weak password** **Preconditions:** *On signup page* **Steps:** 1. Enter valid email2. Enter weak password (e.g. '123')3. Submit form **Expected Result:** Form shows password requirements. Account NOT created until password meets criteria.	**High**	Pass
AU-004	**Duplicate email signup** **Preconditions:** *An account already exists with test email* **Steps:** 1. Try to sign up with an already-registered email2. Submit form **Expected Result:** Clear error message indicating email already in use. No duplicate account created. No information leak about existing accounts.	**High**	Pass
AU-005	**Login with valid credentials** **Preconditions:** *Account exists* **Steps:** 1. Navigate to login page2. Enter valid email and password3. Click 'Log In' **Expected Result:** User logged in successfully. Redirected to dashboard. Session established (can refresh and remain logged in).	**Critical**	Pass
AU-006	**Login with invalid credentials** **Preconditions:** *On login page* **Steps:** 1. Enter wrong password2. Submit3. Enter non-existent email4. Submit **Expected Result:** Generic error message (e.g. 'Invalid email or password'). No specific indication of which field is wrong. Rate limiting after multiple failures.	**High**	Fail
AU-007	**Google OAuth login** **Preconditions:** *Google account available* **Steps:** 1. Click 'Continue with Google'2. Complete Google OAuth flow3. Verify redirect back to Paybacker **Expected Result:** Google popup appears. After auth, user redirected to dashboard. Profile populated with Google account details.	**High**	Fail
AU-008	**Logout** **Preconditions:** *User is logged in* **Steps:**	**Critical**	Fail

ID	Test Case	Priority	Pass/Fail
	1. Click user menu/profile2. Click 'Log Out'3. Try to access dashboard directly via URL **Expected Result:** User logged out. Redirected to landing or login page. Cannot access protected pages. Session cleared.		
AU-009	**Password reset flow** **Preconditions:** *Account exists* **Steps:** 1. Click 'Forgot Password' on login page2. Enter registered email3. Check email for reset link4. Click link and set new password5. Login with new password **Expected Result:** Reset email arrives within 2 minutes. Link works and allows new password. Old password no longer works. New password works.	**High**	Fail
AU-010	**Session persistence** **Preconditions:** *User is logged in* **Steps:** 1. Close browser tab (not full browser)2. Reopen paybacker.co.uk3. Check if still logged in **Expected Result:** Session persists across tab closes. User remains logged in until explicit logout or session expiry.	**Medium**	Fail

3. Dashboard Overview

Tests covering the main dashboard view after login, including stats, navigation sidebar, and overall layout.

ID	Test Case	Priority	Pass/Fail
DB-001	**Dashboard loads after login** **Preconditions:** *User logged in* **Steps:** 1. Login successfully2. Verify dashboard page loads3. Check all widgets/cards render **Expected Result:** Dashboard loads within 2 seconds. Overview stats visible (subscriptions count, total spend, etc.). No loading errors.	**Critical**	Fail
DB-002	**Sidebar navigation works** **Preconditions:** *On dashboard* **Steps:** 1. Click each sidebar item (Dashboard, Complaints, Subscriptions, Opportunities, etc.)2. Verify correct page loads3. Check active state highlighting **Expected Result:** Each sidebar link navigates to correct page. Active item is visually highlighted. Navigation is smooth with no full page reloads.	**Critical**	Pass
DB-003	**Dashboard stats accuracy** **Preconditions:** *User has some data (subscriptions, letters)* **Steps:** 1. Check displayed stats on dashboard2. Cross-reference with actual data on respective pages **Expected Result:** Stats match actual data. Subscription count, monthly spend, letters generated all accurate.	**High**	Pass
DB-004	**Dashboard mobile layout** **Preconditions:** *On dashboard, mobile viewport* **Steps:** 1. View dashboard on mobile (375px)2. Check sidebar becomes hamburger/drawer3. Check all cards stack properly **Expected Result:** Sidebar collapses to drawer/hamburger. Stats cards stack vertically. All content accessible. No overflow.	**High**	Pass
DB-005	**Empty state dashboard** **Preconditions:** *Brand new account, no data* **Steps:** 1. Login with fresh account2. Check dashboard with zero data **Expected Result:** Helpful empty states shown. CTAs to add first subscription, generate first letter, etc. No broken layouts or 'undefined' values.	**Medium**	Pass

4. AI Complaint Letter Generation

Core feature testing: generating AI-powered complaint letters citing UK consumer law.

ID	Test Case	Priority	Pass/Fail
CL-001	**Generate a complaint letter** **Preconditions:** *User logged in* **Steps:** 1. Navigate to Complaints page2. Click 'Generate New Letter' or equivalent3. Fill in complaint details (provider name, issue type, description)4. Click 'Generate'5. Wait for AI response **Expected Result:** Letter generated within 30 seconds. Professional formatting. Cites relevant UK legislation. Addressed correctly. Contains specific complaint details provided.	**Critical**	Pass
CL-002	**Letter cites correct UK law** **Preconditions:** *Generated letter exists* **Steps:** 1. Generate letter for energy bill dispute2. Check legislation references3. Generate letter for broadband complaint4. Check legislation references **Expected Result:** Energy: references Ofgem, Consumer Rights Act 2015. Broadband: references Ofcom, Communications Act. Legislation citations are accurate and relevant.	**Critical**	Pass
CL-003	**Letter types coverage** **Preconditions:** *User logged in* **Steps:** 1. Generate letters for each type: energy, broadband, debt dispute, parking appeal, flight delay, council tax, HMRC rebate, refund request2. Check each generates successfully **Expected Result:** All letter types generate successfully. Each references appropriate regulator and legislation. Format is professional and formal.	**High**	Pass
CL-004	**Letter history / saved letters** **Preconditions:** *At least one letter generated* **Steps:** 1. Navigate to Complaints history tab2. Check previously generated letters appear3. Click to view a saved letter **Expected Result:** All generated letters listed with date, type, and provider. Click opens full letter. Can copy or download letter.	**High**	Pass
CL-005	**Free tier limit - 3 letters/month** **Preconditions:** *Free tier user* **Steps:** 1. Generate 3 letters2. Attempt to generate a 4th letter3. Check what happens **Expected Result:** First 3 letters generate normally. 4th attempt shows upgrade prompt/paywall. Clear message about free tier limit. Link to upgrade.	**Critical**	Fail
CL-006	**Letter quality assessment** **Preconditions:** *Generated letter* **Steps:** 1. Read the generated letter carefully2. Check for: professional tone, correct grammar, specific details included, proper formatting, actionable content **Expected Result:** Letter reads professionally. No grammatical errors. User-provided details correctly incorporated. Clear call to action for the recipient. Proper letter format (address, date, ref, body, sign-off).	**High**	Professional Tone: Meets Correct Grammar: Meets Specific Details Included: Meets Proper Formatting: Meets Actionable Content: Meets Accurate Legal Citation: Meets Overall: Pass

ID	Test Case	Priority	Pass/Fail
MCL-007	**Error handling - empty form submission** **Preconditions:** *On letter generation form* **Steps:** 1. Try to submit with all fields empty2. Try with partial fields3. Try with very short description **Expected Result:** Validation prevents empty submission. Clear error messages on required fields. Minimum description length enforced.	**Medium**	Fail
CL-008	**Copy / download letter** **Preconditions:** *Letter generated* **Steps:** 1. Find copy button on generated letter2. Click and paste elsewhere3. Find download option if available **Expected Result:** Copy to clipboard works correctly. Full letter copied including formatting. Download produces clean document.	**High**	Pass

5. Subscription Tracking

Tests for manually adding, editing, deleting subscriptions and viewing the subscription dashboard.

ID	Test Case	Priority	Pass/Fail
ST-001	**Add a subscription manually** **Preconditions:** *User logged in* **Steps:** 1. Navigate to Subscriptions page2. Click 'Add Subscription'3. Fill in: name, amount, frequency, category4. Save **Expected Result:** Subscription saved and appears in list. Amount formatted with £ symbol. Frequency shown correctly. Appears in monthly/annual spend totals.	**Critical**	Pass
ST-002	**Edit a subscription** **Preconditions:** *At least one subscription exists* **Steps:** 1. Click edit on existing subscription2. Change amount and name3. Save changes **Expected Result:** Changes saved and reflected immediately. Spend totals update. Edit history preserved if applicable.	**High**	Pass
ST-003	**Delete a subscription** **Preconditions:** *At least one subscription exists* **Steps:** 1. Click delete on a subscription2. Confirm deletion3. Check it's removed from list and totals **Expected Result:** Confirmation dialog appears before deletion. After confirming, subscription removed from list. Totals recalculated.	**High**	Fail
ST-004	**Monthly and annual spend totals** **Preconditions:** *Multiple subscriptions added* **Steps:** 1. Add subscriptions with different frequencies (monthly, annual, weekly)2. Check dashboard totals3. Verify calculations **Expected Result:** Monthly total correctly sums all subscriptions normalised to monthly. Annual total = monthly x 12 + annual subs. Calculations accurate.	**High**	Pass
ST-005	**AI cancellation email generation** **Preconditions:** *At least one subscription exists, Essential/Pro plan* **Steps:** 1. Click 'Cancel' or 'Generate Cancellation Email' on a subscription2. Wait for AI to generate3. Review the email **Expected Result:** Cancellation email generated with UK consumer law references. Professional tone. Provider-specific advice included. Ready to copy/send.	**High**	Pass
ST-006	**Subscription categories** **Preconditions:** *On add subscription form* **Steps:** 1. Check available categories2. Add subscriptions to different categories3. Verify category filtering/grouping works **Expected Result:** Multiple categories available (entertainment, utilities, fitness, etc.). Subscriptions correctly grouped. Category totals accurate.	**Medium**	Pass

6. Bank Connection (Open Banking)

Tests for connecting bank accounts via Open Banking, transaction syncing, and spending intelligence.

ID	Test Case	Priority	Pass/Fail
BC-001	**Initiate bank connection** **Preconditions:** *User logged in, on bank connection page* **Steps:** 1. Click 'Connect Bank Account'2. Check Open Banking consent flow initiates3. Select a bank from the list **Expected Result:** Bank selection screen loads. Major UK banks listed. Clear explanation of read-only access. Consent flow follows Open Banking standards.	**Critical**	Pass
BC-002	**Bank consent and redirect flow** **Preconditions:** *Bank selected* **Steps:** 1. Proceed through bank consent2. Authorise on bank's website3. Verify redirect back to Paybacker **Expected Result:** Redirect to bank auth works. After consent, redirected back to Paybacker. Account appears as connected. Transaction sync begins.	**Critical**	Pass
BC-003	**Transaction import and categorisation** **Preconditions:** *Bank connected* **Steps:** 1. Wait for initial sync2. Check transactions appear3. Verify AI categorisation **Expected Result:** Transactions imported correctly. Amounts and dates accurate. AI auto-categorises into 20+ categories. User can recategorise.	**High**	Pass
BC-004	**Spending intelligence dashboard** **Preconditions:** *Bank connected with transactions* **Steps:** 1. Navigate to spending dashboard2. Check category breakdown3. Check monthly trends4. Hover over interactive charts **Expected Result:** Category pie/bar charts render correctly. Monthly trend lines accurate. Hover tooltips show details. Top 5 categories shown on free, full on paid.	**High**	Pass
BC-005	**Auto-detected subscriptions from bank** **Preconditions:** *Bank connected* **Steps:** 1. Check if recurring payments auto-detected2. Verify detected subscriptions match actual recurring payments3. Check they appear in subscription tracker **Expected Result:** Recurring payments correctly identified. Amount, frequency, and merchant name accurate. Can add to subscription tracker with one click.	**High**	Pass
BC-006	**Disconnect bank account** **Preconditions:** *Bank connected* **Steps:** 1. Navigate to bank settings2. Click 'Disconnect'3. Confirm disconnection **Expected Result:** Bank disconnected. Open Banking consent revoked. Historical data handling explained to user.	**Medium**	Pass

7. Email Inbox Scanning

Tests for connecting email (Gmail/Outlook), scanning for opportunities, and the opportunity scanner.

ID	Test Case	Priority	Pass/Fail
ES-001	**Connect Gmail account** **Preconditions:** *User logged in, Gmail account available* **Steps:** 1. Navigate to Email Scanner page2. Click 'Connect Gmail'3. Complete Google OAuth flow4. Grant read-only access **Expected Result:** Google OAuth popup appears. Permissions clearly stated (read-only). After auth, Gmail connected. Scan begins or can be triggered.	**Critical**	Pass
ES-002	**Email scan execution** **Preconditions:** *Gmail connected* **Steps:** 1. Trigger email scan2. Wait for scan to complete3. Check progress indicator **Expected Result:** Progress indicator shown during scan. Scans up to 2 years of history. Completes without errors. Results page loads after scan.	**Critical**	Pass
ES-003	**Opportunity Scanner results** **Preconditions:** *Scan completed* **Steps:** 1. Review scan results2. Check for: overcharges, forgotten subscriptions, flight delay opportunities, debt disputes3. Click on individual opportunities **Expected Result:** Opportunities categorised correctly. Each has clear description, estimated savings, and confidence level. Smart action buttons visible.	**High**	Pass
ES-004	**Smart action buttons** **Preconditions:** *Opportunities found* **Steps:** 1. Test 'Add to Subscriptions' button2. Test 'Write Complaint Letter' button3. Test 'Claim Compensation' button4. Test 'Create Task' button5. Test 'Dismiss' button **Expected Result:** Each action button works correctly. 'Add to Subscriptions' creates subscription entry. 'Write Complaint' opens letter generator pre-filled. 'Dismiss' removes the opportunity.	**High**	Pass
ES-005	**Free tier scan limit** **Preconditions:** *Free tier user* **Steps:** 1. Complete first scan2. Try to initiate second scan **Expected Result:** First scan works. Second attempt shows upgrade message (free = one-time only). Essential = monthly, Pro = unlimited messaging.	**High**	New registered users have a 14 day pro trial, then are not able to test free tier users.
ES-006	**Connect Outlook account** **Preconditions:** *Outlook account available* **Steps:** 1. Click 'Connect Outlook'2. Complete Microsoft OAuth flow3. Verify connection and scan **Expected Result:** Microsoft OAuth works. Outlook connected. Scan functions same as Gmail. Results display correctly.	**Medium**	Pass

8. Pricing & Payments (Stripe)

Tests covering the pricing page, Stripe checkout, plan management, and subscription billing.

ID	Test Case	Priority	Pass/Fail
PP-001	**Pricing page displays correctly** **Preconditions:** *None* **Steps:** 1. Navigate to pricing page2. Check all 3 tiers display3. Verify pricing and features for each **Expected Result:** Free, Essential (£4.99/mo), and Pro (£9.99/mo) tiers shown. Features listed accurately per tier. Annual pricing option available. Toggle between monthly/annual.	**Critical**	Pass
PP-002	**Stripe checkout - Essential monthly** **Preconditions:** *User logged in, free tier* **Steps:** 1. Click 'Upgrade' on Essential plan2. Verify Stripe checkout loads3. Complete payment with test card4. Check plan updates **Expected Result:** Stripe checkout opens. Amount shows £4.99. After payment, user plan updates to Essential. Dashboard reflects new features. Confirmation email received.	**Critical**	Pass
PP-003	**Stripe checkout - Pro monthly** **Preconditions:** *User logged in* **Steps:** 1. Click 'Upgrade' on Pro plan2. Complete Stripe checkout3. Verify plan change **Expected Result:** Checkout shows £9.99/mo. Payment processes. Plan updates to Pro. All Pro features unlocked.	**Critical**	Pass
PP-004	**Annual billing option** **Preconditions:** *On pricing page* **Steps:** 1. Toggle to annual billing2. Verify discounted prices show3. Complete annual checkout **Expected Result:** Annual prices: Essential £44.99/yr, Pro £94.99/yr. Savings clearly shown. Checkout uses annual pricing.	**High**	Pass
PP-005	**Plan downgrade** **Preconditions:** *User on paid plan* **Steps:** 1. Navigate to account/billing settings2. Click downgrade or cancel3. Verify process **Expected Result:** Downgrade option available. Clear explanation of what features will be lost. Effective at end of billing period. Confirmation message.	**High**	
PP-006	**Payment failure handling** **Preconditions:** *On checkout* **Steps:** 1. Use declined test card in Stripe2. Attempt payment3. Check error handling **Expected Result:** Clear error message shown. User not charged. Can retry with different card. No partial state (either fully upgraded or not).	**High**	Pass
PP-007	**Billing history** **Preconditions:** *User with payment history* **Steps:** 1. Navigate to billing/account settings2. Check for invoice/receipt history **Expected Result:** Past payments listed with date, amount, and status. Can download receipts/invoices. Stripe customer portal accessible.	**Medium**	Pass

9. Money Hub / Financial Intelligence

Tests for the Money Hub financial dashboard including budgets, savings goals, and AI chatbot.

ID	Test Case	Priority	Pass/Fail
MH-001	**Money Hub overview loads** **Preconditions:** *User logged in with bank data* **Steps:** 1. Navigate to Money Hub2. Check all widgets load3. Verify income tracking, spending breakdown **Expected Result:** Dashboard loads with income, spending, and net worth sections. Interactive charts render. No loading errors.	High	Pass
MH-002	**Budget planner** **Preconditions:** *On Money Hub* **Steps:** 1. Navigate to budget section2. Set budget limits for categories3. Check progress bars4. Check alert thresholds **Expected Result:** Can set budgets per category. Progress bars show spend vs limit. Approaching/exceeding budget highlighted. Category-linked limits work correctly.	High	Pass
MH-003	**Savings goals tracker** **Preconditions:** *On Money Hub* **Steps:** 1. Create a new savings goal (e.g. Holiday £1000)2. Add progress manually3. Check visualisation **Expected Result:** Goal created with target amount and date. Progress bar updates. Visualisation shows trajectory. Can edit/delete goals.	Medium	Fail
MH-004	**Transaction recategorisation** **Preconditions:** *Transactions imported* **Steps:** 1. Find a miscategorised transaction2. Change its category3. Verify budget totals update **Expected Result:** Can change category via dropdown or search. Budget and spending totals recalculate immediately. Change persists on refresh.	High	Pass
MH-005	**Monthly trends with hover tooltips** **Preconditions:** *Multiple months of data* **Steps:** 1. View monthly trends chart2. Hover over data points3. Check tooltip accuracy **Expected Result:** Trend lines render correctly. Hover shows exact amounts and dates. Multiple months comparable.	Medium	Pass
MH-006	**Guided walkthrough tour** **Preconditions:** *New user first visit to Money Hub* **Steps:** 1. Navigate to Money Hub for first time2. Check if guided tour initiates3. Step through all tour steps **Expected Result:** Tour highlights key features. Steps are clear and informative. Can skip or dismiss. Tour completes without errors.	Medium	Pass

10. AI Support Chatbot

Tests for the AI chatbot available on every page.

ID	Test Case	Priority	Pass/Fail
CB-001	**Chatbot accessible on all pages** **Preconditions:** *User logged in* **Steps:** 1. Navigate to dashboard2. Check chatbot icon visible3. Navigate to subscriptions, complaints, etc.4. Check chatbot visible on each **Expected Result:** Chatbot icon/button visible on every page. Positioned consistently (bottom-right corner typically). Does not obstruct content.	**High**	Pass
CB-002	**Basic UK consumer rights question** **Preconditions:** *Chatbot open* **Steps:** 1. Open chatbot2. Ask 'What are my rights if my broadband is too slow?'3. Check response quality **Expected Result:** Response references Ofcom, Consumer Rights Act 2015. Provides actionable advice. Accurate UK-specific information. Professional tone.	**High**	Pass
CB-003	**Chatbot escalation to support** **Preconditions:** *Chatbot open* **Steps:** 1. Ask a complex question the bot can't answer2. Request human support3. Check escalation path **Expected Result:** Bot acknowledges limitation. Offers to create support ticket. Ticket creation works. User gets confirmation.	**Medium**	Pass
CB-004	**Chatbot conversation persistence** **Preconditions:** *Active chatbot conversation* **Steps:** 1. Have a multi-turn conversation2. Close chatbot3. Reopen chatbot4. Check if history preserved **Expected Result:** Conversation history visible on reopen (within same session). Context maintained for follow-up questions.	**Low**	Pass

11. Renewal Reminders & Contract Tracking

Tests for contract end date tracking and renewal reminder emails.

ID	Test Case	Priority	Pass/Fail
RC-001	**Add contract with end date** **Preconditions:** *User on Essential/Pro plan* **Steps:** 1. Navigate to contracts or subscriptions2. Add subscription with contract end date3. Set contract type, term length, annual cost **Expected Result:** Contract details saved correctly. End date visible on subscription card. Contract info editable.	High	Fail
RC-002	**Renewal reminder settings** **Preconditions:** *Contract with end date set* **Steps:** 1. Check renewal reminder settings (30/14/7 days)2. Verify reminders are configured3. Check if custom reminder periods available **Expected Result:** Reminder intervals clearly shown (30, 14, 7 days before). Can enable/disable. Settings save correctly.	High	Pass
RC-003	**Renewal reminder email delivery** **Preconditions:** *Contract ending soon* **Steps:** 1. Set a contract end date to tomorrow (or within reminder window)2. Check email inbox for reminder3. Verify email content **Expected Result:** Reminder email received at correct interval. Email contains: subscription name, end date, recommended actions, link back to Paybacker.	High	Pass

12. Loyalty Rewards

Tests for the points-based loyalty reward system.

ID	Test Case	Priority	Pass/Fail
LR-001	**Points earned for actions** **Preconditions:** *User logged in* **Steps:** 1. Generate a complaint letter2. Add a subscription3. Check points balance after each action **Expected Result:** Points awarded for each action. Balance updates in real-time. Point values match documented system.	**Medium**	Pass
LR-002	**Loyalty tier progression** **Preconditions:** *User with points* **Steps:** 1. Check current tier (Bronze/Silver/Gold/Platinum)2. Check points needed for next tier3. Verify tier benefits **Expected Result:** Current tier displayed correctly. Progress to next tier shown. Tier benefits clearly listed.	**Medium**	Pass
LR-003	**Redeem points for discounts** **Preconditions:** *User with sufficient points* **Steps:** 1. Navigate to rewards/loyalty page2. View redemption options3. Attempt to redeem points **Expected Result:** Redemption options clearly shown. Can redeem for subscription discounts. Balance updates after redemption.	**Medium**	Pass

13. Profile & Account Settings

Tests for user profile management and account settings.

ID	Test Case	Priority	Pass/Fail
PA-001	**View and edit profile** **Preconditions:** *User logged in* **Steps:** 1. Navigate to Profile page2. Check displayed information3. Edit name, email, or other fields4. Save changes **Expected Result:** Profile displays correct information. Edits save successfully. Changes reflected across the app.	**High**	Pass
PA-002	**Change password** **Preconditions:** *User logged in* **Steps:** 1. Navigate to account settings2. Find password change option3. Enter current and new password4. Save **Expected Result:** Password change requires current password. New password validated. Success message shown. Can login with new password.	**High**	Fail
PA-003	**Delete account** **Preconditions:** *User logged in* **Steps:** 1. Find delete account option2. Check for confirmation steps3. Verify data deletion policy **Expected Result:** Delete requires multiple confirmations. Clear explanation of what data is deleted. GDPR compliance. Irreversible warning.	**Medium**	Pass

14. Cross-Browser & Cross-Device Testing

Tests to verify the application works consistently across browsers and devices.

ID	Test Case	Priority	Pass/Fail
XB-001	**Chrome (latest) compatibility** **Preconditions:** *Chrome browser* **Steps:** 1. Run through core flows in Chrome2. Check layout, functionality, console errors **Expected Result:** All features work. No layout issues. No console errors. Smooth interactions.	**Critical**	Pass
XB-002	**Firefox (latest) compatibility** **Preconditions:** *Firefox browser* **Steps:** 1. Run through core flows in Firefox2. Check for browser-specific issues **Expected Result:** All features work. No CSS differences. Forms function correctly.	**High**	Fail - Issue reported for LP-001
XB-003	**Safari (latest) compatibility** **Preconditions:** *Safari browser (Mac/iOS)* **Steps:** 1. Run through core flows in Safari2. Pay attention to flexbox, grid, date inputs **Expected Result:** All features work. Safari-specific CSS renders correctly. Date pickers work.	**High**	Pass
XB-004	**Mobile Safari (iPhone)** **Preconditions:** *iPhone or iOS simulator* **Steps:** 1. Navigate site on iPhone2. Test all core flows3. Check touch interactions, scroll, zoom **Expected Result:** Fully functional on mobile Safari. No viewport issues. Touch interactions smooth. No zoom quirks.	**High**	Pass
XB-005	**Android Chrome (mobile)** **Preconditions:** *Android phone* **Steps:** 1. Navigate site on Android Chrome2. Test all core flows3. Check touch and scroll behavior **Expected Result:** Fully functional on Android. Layout correct. All buttons/links tappable. No horizontal scroll.	**High**	Pass

15. Security & Edge Cases

Security-focused tests and edge case handling.

ID	Test Case	Priority	Pass/Fail
SE-001	**HTTPS enforcement** **Preconditions:** *None* **Steps:** 1. Try accessing http://paybacker.co.uk2. Check if redirected to https **Expected Result:** HTTP automatically redirects to HTTPS. SSL certificate valid. No mixed content warnings.	**Critical**	Pass
SE-002	**Protected routes without auth** **Preconditions:** *Not logged in* **Steps:** 1. Try accessing /dashboard directly2. Try /complaints3. Try /subscriptions4. Try API endpoints directly **Expected Result:** All protected routes redirect to login. No data exposed. API returns 401 Unauthorized.	**Critical**	Fail
SE-003	**XSS prevention** **Preconditions:** *User logged in* **Steps:** 1. Enter <script>alert('xss')</script> in subscription name field2. Enter in complaint description3. Enter in chatbot4. Check if scripts execute **Expected Result:** Scripts never execute. Input properly sanitised. HTML entities escaped. Content displays as plain text.	**Critical**	Pass
SE-004	**Rate limiting** **Preconditions:** *User logged in* **Steps:** 1. Rapidly submit 20+ complaint letter requests2. Check if rate limiting kicks in3. Try rapid login attempts **Expected Result:** Rate limiting active after threshold. Clear message about rate limit. Resumes after cooldown period.	**High**	Pass
SE-005	**Long text / special characters** **Preconditions:** *On any input form* **Steps:** 1. Enter very long text (5000+ chars) in description fields2. Enter special characters: £€éñüß3. Enter emojis4. Enter only whitespace **Expected Result:** Long text handled gracefully (truncated or error). Special characters display correctly. Emojis render. Whitespace-only rejected.	**Medium**	Fail
SE-006	**Concurrent session handling** **Preconditions:** *User logged in* **Steps:** 1. Login in two different browsers simultaneously2. Perform actions in both3. Check for conflicts **Expected Result:** Both sessions work or clear policy on single-session. No data corruption from concurrent access.	**Medium**	Pass

16. UX Quality Assessment

Subjective UX assessment covering usability, design consistency, and user experience quality.

ID	Test Case	Priority	Pass/Fail
UX-001	**First-time user onboarding** **Preconditions:** *New account, first login* **Steps:** 1. Sign up as a new user2. Note any onboarding flow/tour3. Assess: Is it clear what to do first?4. Rate difficulty 1-5 of getting started **Expected Result:** Assessment: Clear first-time guidance. User knows what features are available and how to start. No confusion about next steps.	**Critical**	Pass It's very clear what to do first after login the dashboard, difficulty: 2 (easy)
UX-002	**Error messages quality** **Preconditions:** *Trigger various errors* **Steps:** 1. Trigger form validation errors2. Trigger server errors (if possible)3. Trigger auth errors4. Note each error message **Expected Result:** Assessment: Error messages are specific, helpful, and suggest how to fix. No generic 'Something went wrong'. No technical jargon.	**High**	Pass Error messages are specific, helpful, but lots of input box not has validation, e.g. phone number, character limitation etc.
UX-003	**Loading states and feedback** **Preconditions:** *Perform actions across the app* **Steps:** 1. Generate a letter (long operation)2. Save a subscription3. Connect bank4. Note loading indicators and feedback **Expected Result:** Assessment: Every action has visual feedback. Loading spinners/skeletons shown during waits. Success/error confirmations appear. No 'dead clicks'.	**High**	Pass Loading states and feedback is clear.
UX-004	**Navigation intuitiveness** **Preconditions:** *Explore the full app* **Steps:** 1. Navigate to all major sections2. Try to find specific features3. Assess: Can you find everything without help?4. Check breadcrumbs/back navigation **Expected Result:** Assessment: Navigation is logical and intuitive. Features findable without documentation. Back button works correctly. Current location always clear.	**High**	Pass
UX-005	**Visual design consistency** **Preconditions:** *Browse all pages* **Steps:** 1. Check button styles across pages2. Check font sizes and spacing3. Check color usage4. Check icon consistency **Expected Result:** Assessment: Buttons, fonts, colours, and spacing consistent throughout. Dark premium aesthetic maintained. Gold accents used consistently. No jarring style differences between pages.	**Medium**	Pass
UX-006	**Accessibility basics** **Preconditions:** *Keyboard and screen reader available* **Steps:** 1. Tab through main flows with keyboard only2. Check focus indicators visible3.	**High**	Pass

ID	Test Case	Priority	Pass/Fail
	Check colour contrast4. Check alt text on images5. Check ARIA labels on interactive elements **Expected Result:** Assessment: Tab order logical. Focus indicators visible. Text passes WCAG AA contrast ratio. Images have alt text. Forms have labels.		
UX-007	**Content quality and tone** **Preconditions:** *Read all user-facing copy* **Steps:** 1. Read headings, descriptions, CTAs across the app2. Check for: British spelling, £ symbols, UK terminology3. Check for typos or unclear copy **Expected Result:** Assessment: All copy uses British English. £ used throughout (never $). UK-specific terminology. No typos. Professional but approachable tone.	**Medium**	Pass
UX-008	**Overall satisfaction rating** **Preconditions:** *Completed all testing* **Steps:** 1. Rate overall experience 1-102. List top 3 things that work well3. List top 3 things that need improvement4. Would you recommend this to a friend? **Expected Result:** Free-form assessment: Overall score, strengths, weaknesses, and recommendation. Most valuable feedback for product improvement.	**High**	Pass

Field	Value
Tester Name	Sheva Ma
Date Completed	2026/4/15
Browser(s) Used	Chrome, Firefox, Safari, Edge, Android Chrome, iPhone Safari
Device(s) Used	Macbook, Windows desktop, Samsung S22, Ipad air
Total Tests Passed	94/ 94
Total Tests Failed	18
Critical Bugs Found	2
Overall Score (1-10)	8
Top 3 Strengths	AI complaint letter generation is fast, professional, and accurately cites UK consumer law. Subscription management helps users easily track and organise their recurring payments. Savings goals tracker allows users to set targets, monitor progress, and stay motivated.
Top 3 Issues	Most input boxes lack validation or restrictions. For example, phone number fields should only allow numeric input. Popup dialogs do not have scrollbars. If the content exceeds the screen height, the lower part of the content becomes inaccessible. The logout button placement is not ideal. It could be fixed to the bottom left corner of the screen for better usability.
Would You Recommend? (Y/N)	Yes, I would recommend Paybacker to UK consumers who need help disputing bills and managing subscriptions.
Additional Comments	Great product with strong core features. A few UX polish items (input validation, popup scrolling, logout placement) would make it even better. Happy to retest after fixes.
